I do not perceive all the dangerous reviews. These headphones sound nice and work nice - just about as good as the unique Apple headphones that got here with my Iphone (which I lost and is why I bought these)... perhaps not fairly as great sound, however nearly the identical, you may hardly tell. For the very small fraction cost of what Apple prices, these are nice, and I would positively purchase these again as a substitute of Apple's which cost about 10 occasions as much.

I purchased these headphones as a cheap and streamlined headphone with microphone to use with my Android phone. So far, the standard has been quite good for what amounted to a \$3 investment, they usually look simply as within the picture. Hopefully they last!

UPDATE: After about 9 months of continuous use, the correct earbud lastly died. The only drawback I had earlier than that was that the microphone was usually too quiet for casual conversation, however the reality stays for a \$three pair of headphones these worked quite good for quite a while.

I was more than happy to obtain this product i literally obtained it in like 5 days and they work completely for such an inexpensive worth, and also the mic works identical to my apple headphone till i broke it. i feel its an important product to buy

This item is precisely what it was described as. It came in 3 packaging which saved the headphones safe from damage throughout delivery and it was delivered inside the anticipated time. Great product, many thanks.

The stereo headphones w/ mic for apple iphone 3g are great. THERE MODLED AFTER THE REAL APPLE HEADPHONES but there for the iphone. There not real apple headphones. For these of you who think your getting real apple headphones, youre wrong. so dont come again here and complain that you just didnt get real apple headphones. no they didnt "false promote". You shouldnt complain anyways, they had been 2 bucks. come on people.

By an accident my headphones ended up going by a full cycle in my laundry being heavy washed and heavy dried. when I found them whereas pulling the clothes out I was sure they were done for not only were they working completely, they have been really working higher than before (before the sound on the right side was decrease than the left) either manner they came out completely except for being extremely tousled but that was

taken care of in 10 minutes ...More
